

## HANDY PACK HOT MELT GLUE APPLICATOR

The Handy Pack gluing equipment is extremely compact and very easy to use. It's really flexible as it can easily handle different pack sizes and configurations, with only a simple and quick format change.

Thanks to its simplicity and low cost, this equipment is adequate for both small and big companies. Its flexibility makes it the most versatile pack gluer available in the market.

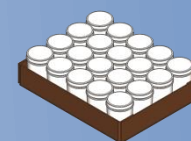

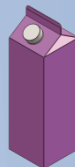

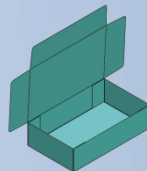

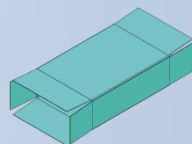

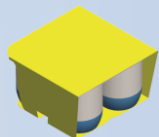

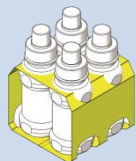

It can also be useful as auxiliary equipment for working tips, limited offers, special deals or as backup equipment to avoid production stops for maintenance.

### ADVANTAGES

- ✓ **Versatile**
- ✓ **Compact**
- ✓ **No risk of burns**
- ✓ **Clean pack finishing**
- ✓ **Cheaper consumables**
- ✓ **No maintenance needed**

### EXPERTS IN PACKAGING

## TECHNICAL FEATURES

- 220-240 V monophase.
- Thermal safety of the engine.
- Control of glue pot temperature: 0-240°C
- Designed for the use of hot melt (cheaper than traditional glue guns).
- Approximate equipment size: 600mm L x 385mm W x 225mm H.
