

Our MULTIPACK machine series is the result of more than 30 years' experience in the design and manufacturing of tailor-made solutions, in accordance to every product and production need.

These machines are of solid and compact design, with easy access for cleaning and maintenance. They are extremely reliable and they have been conceived to be operated easily and intuitively.

Our fully automatic machine range at continuous motion can run from 35 up to 120 packs/minute (depending on the machine model). Format changes are also easy to do: a qualified operator can make them in only a few minutes.

EXPERTS IN PACKAGING

ADVANTAGES

- ✓ *Flexible and versatile*
- ✓ *Compact design*
- ✓ *Quick format change*
- ✓ *User friendly*
- ✓ *Production increase*
- ✓ *Cost reduction*

TECHNICAL FEATURES

- Mainly made of stainless steel.
- CE Certificate.
- Servo technology.
- From 35 up to 120 packs/minute (depending on machine model).
- PLC with 7" color touch screen.
- Remote connection system by Internet.
- Meler hot melt glue equipment.
- 380V 3 phases 50Hz neutral + earth (or as per customer's requirements).
- Pneumatic supply: 6 bars.
- Weight: 1,000 - 4,500kg
- Freedom to choose any carton, material or packs supplier.
- Flexibility to use different paperboard types; even recycled paperboard (subject to product and pack features).
